

ESCAPE THE EXPERIMENT

ANNOUNCEMENTS

Escape the Experiment is a dynamic, interactive activity intended to educate young people (grades 7–12) about the dangers of vaping.

Preventing Vaping in School Washrooms

Announcement 1:

Vaping indoors affects more than you. Secondhand vapour is not harmless, it contains nicotine and other toxic particles. Be kind. Take the clouds outside.

Announcement 2:

Don't let your money vapourize. If you vape in school washrooms, you could face a \$305 fine. Take the clouds outside.

Announcement 3:

Let's play a game of would you rather. Would you rather buy a concert ticket, a day at an amusement park or pay a \$305 fine for vaping in the school washroom? Take the clouds outside.

Announcement 4:

Think vaping is cheap? Think again. Vaping on school property could cost you \$305, so save your money and don't treat your health like an experiment. Learn more at NotAnExperiment.ca.
